

Cache Lab Release Notes

5/2/2016

- Fixed bug in `grade-cache1ab.pl` autograder that relied on `bash` syntax that is incompatible with `sh`.
Thanks to Prof. Hugh Lauer, Worcester Polytechnic Institute

5/06/2014

- The current version of the lab requires a 64-bit x86-system. Added comments to this effect to the READMEs, and added an explicit `-m64` flag to the Makefiles. *Thanks to Prof. Hugh Lauer, Worcester Polytechnic Institute.*

1/22/2013

- Initial release.
- This lab requires a version of [Valgrind](#) that supports the "`--tool=lackey`" option, which is used to generate address traces.
